

GEOLOGICAL BULLETIN OF CHINA

Vol. 33, No.6, Jun., 2014 (Serial No. 229)

Contents

- SHRIMP zircon U–Pb dating of the Jiangshan–Shaoxing faulted zone in Zhejiang and Jiangxi
..... GAO Lin-zhi, ZHANG Heng, DING Xiao-zhong, et al. (763)
- Geochemistry and LA–ICP–MS zircon U–Pb age of Late Carboniferous Shalazhashan pluton on the northern margin
of the Alxa Block, Inner Mongolia and their implications YANG Qi-di, ZHANG Lei, WANG Tao, et al. (776)
- Detrital zircon LA–ICP–MS U–Pb ages of the Paleogene Leidashu Formation in Huili, Sichuan Province
and their geological significance JIANG Zhuo-fei, CUI Xiao-zhuang, WU Hao, et al. (788)
- Geochemical characteristics and LA–ICP–MS zircon U–Pb ages of intermediate to mafic dyke swarms in Haxiya area,
Golmud, Qinghai Province YANG Liu, ZHOU Han-wen, ZHU Yun-hai, et al. (804)
- LA–ICP–MS zircon U–Pb dating, geochemistry and tectonic implications of the Qieshijiebie gabbro
on the northern margin of South Pamir HONG Jun, JI Wen-hua, ZHANG Hui-shan, et al. (820)
- Middle Permian–Early Triassic mafic magmatic events in Kaixinling zone, Tuotuo River area, Qinghai Province,
and their geological significance ZHANG Hui-shan, JI Wen-hua, HE Shi-ping, et al. (830)
- LA–ICP–MS zircon U–Pb age and geochemical characteristics of quartz diorite from the Haxiyatu iron–polymetallic
ore district in Eastern Kunlun NAMKHA Norbu, JIA Qun-zi, LI Wen-yuan, et al. (841)
- Geochemistry, zircon U–Pb age and implications of the Linzizong Group volcanic rocks in Shiquan River area,
western Gangdise belt, Tibet FU Wen-chun, KANG Zhi-qiang, PAN Hui-bin. (850)
- LA–ICP–MS zircon U–Pb age and geochemistry of Xiatianba A–type granites in Dongchuan, Northeast Yunnan,
and their tectonic significance WU Yu-dong, WANG Zong-qi, LUO Jin-hai, et al. (860)
- The restoration of karst ancient landform of the Maokou Formation in southeastern Sichuan basin
..... HU Xiu-quan, SHI Ze-jin, TIAN Ya-ming, et al. (874)
- Three dimensional quantitative extraction and integration for geosciences information: A case study of the
Luanchuan Mo ore district LI Rui-xi, WANG Gong-wen, ZHANG Shou-Ting, et al. (883)
- SHRIMP zircon U–Pb ages of Xuwu subdacitic porphyry in the Dabaoshan ore district of northern Guangdong
Province and its geological implications PAN Hui-bin, KANG Zhi-Qiang, FU Wen-chun. (894)
- The discovery of rutile deposits in Yuqia–Tieshiguan area on the northern margin of Qaidam Basin
and its geological significance WANG Yong-kai, XU Yong-li, ZHENG You-ye, et al. (900)
- Metallogenic age of the Matoutan gold deposit in East Tianshan and its geological significance
..... LIU Chong-peng, YANG Hong-mei, DUAN Rui-chun, et al. (912)
- Geochemical characteristics of ferriferous silicalites in the Zheyaoshan deposit of the Baiyinchang copper
polymetallic orefield in Gansu Province and their ore–prospecting significance
..... DU Ze-zhong, YE Tian-zhu, PANG Zhen-shan, et al. (924)
- Characteristics and control factor of the relatively high permeability reservoir in the low permeability oil gas pool:
A case study of Chang 10₁ oil layer of upper Triassic Yanchang Formation in Zhidan area, Ordos Basin
..... ZHAO Hong, DANG Ben, KANG Xiao-yan, et al. (933)
